S.M. 7/1/51

Letter No.3870 FWW/49-59, dated 27th July 1951.

Sub: Tuberculosis Sanatorium, Mudashedde, South Kanara District - Revised plan of proposed Administration Block and final detailed layout of hospital buildings - regarding-

Ref: Letter No.68/51, dated 29-6-51 to the Director of Medical Services.

P.P. 36 mtr

I enclose a copy of the letter No.68/51 dated 29-6-51 from the President, Madras Provincial welfare Fund, addressed to the Director of Medical Services wherein the deviations proposed in the layout of the hospital buildings from the sanctioned plan T.S.M.No.6/51 and also in the sanctioned design for the Administration Block (Plan T.S.M.No.2/50) have been dealt with in detail. As the above contain modifications to plans approved by the Director of Medical Services, I forward herewith the revised plans for obtaining approval of Government to the alterations proposed. In this connection it is also pointed out that the Director of Medical Services is agreeable to the suggestions and has countersigned the plans in token of his approval.

2. The revised layout is in respect of four blocks viz., Administration, Operation, Laboratory and X-Ray blocks which are to be located on a hill top. After detailed spot levels were taken it was noticed that as per original layout (Plan T.S.M.No.13/51) the Operation block would come very close to the edge of a steeply falling ground. Moreover the eastern portion of the site is reported to be an out crop of laterite rock which would cost a good deal for levelling. It has therefore been suggested to revise the layout (as per plan T.S.M.No.10/51) so as to have the four blocks on the summit of the hillock. In view of the nature of terrain the revised layout may be approved.

3. The approved design for the Administration Block (Plan No.T.S.M.No.2/50) has also been altered (Plan T.S.M.No.9/50) to suit the site. It may be noted that no alterations have been made in regard to the facilities and no great alteration in the matter of accommodation. A front portico has now been added to improve the frontage of the building besides the added amenity thereby. The President has in para 7 of his letter stated that whatever extra cost is involved in the above proposal apart from the previous sum of Rs.5,000/- out of the sanctioned estimate amount of Rs.42,000/- for the above block will be met by the District Branch. In view of the above, I recommend that the change in design also may be approved by Government.

Encls: (1). Plan T.S.M.No.2/50.
(2). Plans T.S.M.Nos.9,10 & 13/51. for Chief Engineer, P.W.D. (Bldgs. & C.M.F.)
(3). Copy of letter No.68/51 dated 29-6-51 from the President Madras Provincial welfare Fund.

S for passed in letter

Copy of letter No.62/51, dated 2229-6-51, from the President, The Madras Provincial Welfare Fund, South Kanara District Branch, Mangalore 1., to the Director of Medical Services, Madras 6.

Sub: Tuberculosis Sanatorium, Mudashedde, South Kanara District.

Revised Plan of the proposed Administration Block, final detailed Lay-out Plans of the same with Operation, Laboratory, X-Ray and Ward Blocks, etc. - Administrative approval sought

I have the honour to state that subsequent to para 2 of my Honorary Treasurer's letter No.65/51 dated 7-5-1951 addressed to you as also to the Chief Engineer, P.W.D., Buildings & G.M.F., Madras, we have examined, after taking detailed spot levels, as to how far the location of the Administration Block on the sanctioned site No.1 shown on the Lay-out Plan T.S.M.No.6/51, will permit the future erection of the Laboratory, Operation, and X-Ray Blocks on the sites Nos.2, 3 and 4 as shown on the said Plan. Presumably, these layouts could only roughly be indicated by the Consulting Architect on his Plan C.A.No.254/49 with the meagre information and levels when available. Drg. T.S.M.No.6/51 is an exact copy of C.A.No.254/49.

2. I enclose herein for favour of perusal Trial Lay-out Plan, T.S.M.No.13/51, which shows with level contours, the spot levels taken at close intervals on the top of the hillock, where are to be erected the above-mentioned 4 blocks as indicated by the Consulting Architect. These four blocks are shown on the plan with the proposed ground and plinth levels of 149.00, 151.00 respectively, as they will have to be.

I also enclose herein Drg. T.S.M.No.11/51 which shows the level contours of the above hillock and spot levels of the ground below on which Ward Blocks are to be built. This will give an idea of the close proximity of the much lower ground.

3. Coming to the above-mentioned Drg. T.S.M.No.13/51, the Administration Block as already sanctioned, i.e., as per Drg. T.S.M.No.2/50, is marked on the former on the exact position (i.e. site No.1) shown in Drg. T.S.M.No.6/51. The Plan also shows the Operation, Laboratory and X-Ray blocks set out adopting the designs already approved by you in the case of T.B. Sanatorium at Pariyaram, North Malabar, viz. J.C.A. Nos.172 4/60. They will suit Mudashedde equally well, this being on the same coast and being no bigger scheme than Pariyaram.

The above site for the Administration Block as marked on Drg. T.S.M.No.13/51 is evidently correct and suitable and needs no alteration whatever by shifting its position in any direction.

But it will be seen that if we now build the Administration Block as per sanctioned Plan T.S.M.No.2/50, later the erection of the Operation, Laboratory and X-Ray Blocks will be far too complicated or well high impossible. Because, while the Laboratory & X-Ray Blocks can be made to fit in fairly suitably though so closely as shown on Drg. T.S.M.No.13/51, the Operation Block will be so precariously close to the edge of the steeply falling ground, that it will cost exorbitantly to make up and retain some reasonable width of ground at level of 149.00 on the east and south-east of the Block.

Most of the top of this hillock is out-crop of laterite rock. While the western portion is fairly even, the eastern portion, particularly where the Operation Block will be situated, is very rugged and irregular cut-crop of hard laterite rock and has very forbidding appearance. It will cost a great deal to clear the protruding rocks. To raise and make up the ground to level 149.00, gravel will have to be brought from far below the hill top and it

will cost far too much.

It will also be seen from Drg. T.S.M.No.13/51 that the four blocks have to be set out touching each other and cannot be kept removed from each other as indicated by the Consulting Architect on his lay-out Plan C.A.No.254/49 (or Drg. T.S.M.No.6/51). Nevertheless, the result is very unsatisfactory and this modest and congested lay-out may ultimately be found not feasible in practice. And it will be a pity to have to shift from the hill top and erect any of the other three blocks on the lower ground below. This is undesirable from all points of view, administrative or otherwise.

The hill top has commanding situation. It is a beauty spot with fine view all round.

All this means that the design of the Administration Block as sanctioned has to be so altered as to enable the location of the other three blocks suitably and satisfactorily.

4. It will be seen from Drg. T.S.M.No.13/51 that the ground on the situation of the Administration Block has good long frontage with even ground at +148.00. Consequently the front or central wing can with advantage be lengthened and the side wings shortened on the lines of the design, J.C.A.No.171/50, of the Administration Block approved by you for the T.B. Sanatorium at Pariyaram, which design also indicates that the operation block is to be erected centrally behind the Administration Block.

5. If the Administration Block as sanctioned (Drg. T.S. M. No.2/50) is altered as above, the Operation Block, as shown on the enclosed final Lay-out plan, T.S.M.No.10/51, will very suitably and conveniently go centrally behind the Administration Block with an intervening court-yard measuring 91'-3" x 60' and the Laboratory and X-Ray Blocks can be very suitably erected.

The position of the Administration Block shown on Drg.T.S.M. No.10/51 is indentically the same as that on Drg. T.S.M.No.13/51, but while on the latter the block is drawn as per previously sanctioned plan T.S.M. No.2/50. In the former the block is marked in accordance with the ~~now~~ enclosed revised design, T.S.M. No.9/51.

6. The sanctioned plan of the Administration Block, T.S.M.No.2/50 is altered as follows as will be seen from the revised plan, T.S.M. No.9/51:-

i. The two 6' wide corridors proposed between W.C. & Store in the east wing and W.C. & Records in the West wing are dispensed with being quite unnecessary, because with the arrangements shown on Drg. T.S.M.No.10/51, the verandahs of the side wings of the Administration Block are to be extended as corridors to connect up with the Operation, Laboratory & X-Ray Blocks.

ii. The R.M.O's Room from the west wing and the Duty Room from the east wing are shifted to the front or central wing and placed on either side of the Entrance Hall. While doing so, the sizes of the two rooms are increased from 14' x 12' to 14' x 14', just the same as of Matron's Room. This enlarged accommodation will also be advantageous as the Operation, Laboratory and X-Ray Departments may have to be kept in the Administration Block for quite a long time.

iii. The width of the Entrance Hall is increased from 10' to 12' which is also the width of the similar central Entrance Hall straight opposite in the Operation Block as per J.C.A. No.172/50.

iv. The two side wings are moved to the front by 3' beyond the south face of the central wing and the walls will be gabled

and finished as shown on Drg. T.S.M.No.9/51 so as to improve the appearance of the building.

v. A Portico will be provided as shown on Drg. T.S.M. No. 9/51 so as to leave nothing more to be desired.

vi. The 4' roof eave projections as shown on Drg. T.S.M. No. 2/50, to serve as sun and weather shadow over the window opening are liable to be blown off by high winds usual during the monsoon in this plateau. They are dispensed with, the tiled roof will be project just 4" beyond the outer face of the wall and R.C.Sunshades with 3' projection will be provided as shown on Drg. T.S.M. No. 9/51.

vii. In the sanctioned estimate, no provision is made for plastering the exterior faces of the walls, but only to point them as masonry work proceeds. But now with the roof projection cut short and in order to keep the ~~walls~~ walls free from damp or to improve the appearance, the outside ~~in~~ faces of the walls from 6" below ground level upto the level of the R.C.Sunshades will be plastered 1/2" thick with cement mortar 1:5 and white or colour washed 2 coats and the more exposed portion above the Sunshades washed 2 coats as lime mortar is more impervious to damp than the weak cement mortar 1:5.

will be plastered with lime mortar 2 coats and white or colour

viii. Reduction of the width of the north end rooms in the two wings containing the W.C. and Bath compartments from 9 to 8'-0" following the Pariyaram Design for Administration Block approved by you, JCA.No. 171/50. As 8' is accepted for Pariyaram, it will suit Mudashe equally well, This point has been noticed subsequent to the preparation of the present design T.S.M.No. 9/51 and the enclosed General Specification or structural calculations. And hence the suggestion to reduce the width from 9' to 8' could only be noted in Indian Ink on the plan.

7. This District Branch will meet themselves whatever extra cost is involved in the above proposals apart from the previous excess sum of Rs. 5,000/- out of the sanctioned estimate amount of Rs.42000/- for the Administration Block vide para 3 of the Honorary treasurer's letter No. 25/50 dated 15-12-50 (Copy submitted to the Chief Engineer PWD(Buildings and GMF in No. 26/50 of 15-12-50) Hence there appears no need to submit or obtain technical sanction to any revised estimate. All that is now necessary in accordance with para (1) of G.O. Ms.No. 3096 Health dated 5-9-50 is to obtain your administrative approval to these proposals and technical approval of the Chief-Engineer to the present designs and enclosed supplemental specification and structural calculations which are also submitted to him.

@ at plan T.S.M No 6/51 vide para 16 of the Honary Engineer

8.Drg. T.S.M.No. 11/51 shows with details of levels etc., the positions of the 3 ward Blocks marked (A) (B) & (C) corresponding to the sites No. 5, 5(10) & 5(3A) shown on the Layout letter No. 65/51 dated 7-5-1951 addressed to you as well as to the Chief Engineer. The situations of the Blocks are identically the same in both the cases. Block(A) is the sanctioned Twin ward of 40 beds now to be built.

9.Drg. T.S.M.No. 11 & 12/51 show with levels and specifications the central approach road in embankment and central masonry steps leading to the Administration Blocks which we propose providing if our own funds permit. Hence these proposals also may ~~now~~ now kindly be approved along with the rest.

10. We are in a position to put in hand the construction of the Administration Block and wish to proceed with it at once, and I, therefore earnestly solicit that you may be pleased to accord urgent approval to:-

1.the revised plan of the Administration Block, T.S.M.No. 9/51 in supersession of the previous approved plan TSM No. 2/50.

ii. The final detailed Lay-out Plans TSM.No. 10 and 11/51 of the Administration, Operation, Laboratory and E-Ray Blocks, as also of the three ward blocks (A) (B) & (C) discarding the trial layout shown in Drg. T.S.M.No. 13/51, and

iii. at the same time to the proposed central approach road and masonry steps shown on Drg TSM.No. 11 & 12/51.

11. B.P.Copies of Drgs. TSM.No. 9 to 13/51 with supplemental specification and structural calculations are submitted herewith in duplicate. Of these, one set is for record in your office and the other set is for favour of your urgent approval countersignature on the same and transmission to the Chief Engineer, PWD (Buildings and GMF) Madras (under advised to me) so that he may accord technical approval thereon and the set to me as expeditiously as possible in order to enable us to proceed with the work of the Administration Block.

12. A copy of this letter is being submitted to the Chief-Engineer, PWD. and copy of the covering letter addressed to him, No.69/ dated 29-6-51.

Thanking you,

Yours faithfully

Sd. x x x
President The Madras Provincial
Welfare Fund. South Kanara

MEDICAL DEPARTMENT.

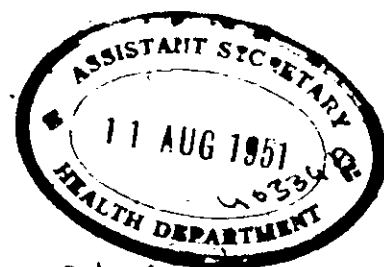

From

Dr.K.Vasudeva Rao, M.D., F.R.C.P. (Edin), T.D.D. (Wales),
Director of Medical Services,
Madras-6.

To

The Secretary to Government,
Health Department,
Madras.

Ref. 88881-10-G2 dated 8-8-1951.

Sir,

Ref:-- G.Os. Nos. 3403-P.H., dated 26-9-1949 and 3096 P.H.
dated 5-9-1950 - Tuberculosis - Construction of
a Tuberculosis Sanatorium at Mudshedde (South
Kanara District).

Certain modifications to the original plan for the construction of twin ward of 20 beds in the Tuberculosis Sanatorium, Mudshedde were proposed by the President, South Kanara District Branch of the Madras Provincial Welfare Fund and they were approved by me. The Chief Engineer, Public Works Department (Buildings and G.M.F.), states that deviations from the sanctioned plan T.S.M.No.1/50 for the proposed twin ward block have to be approved by the Government with reference to para 102 of the Public Works Department Code. A copy of letter of the President. No.73/51 dated 2-7-51 explaining the necessity for these modifications is enclosed for the information of Government. Copies of plans T.S.M.Nos.1/50 and 14/51 are also forwarded for reference and return.

It is requested that the Government will be pleased to accord the necessary approval to the modifications proposed.

Yours faithfully,

for Director of Medical Services.
Madras.

Copy of Letter.

Sub:-- Tuberculosis Sanatorium, Mudshedde, South Kanara District.
Twin Ward of 20 beds each - Revised Design of, in place of Drg. T.S.M.No.1/50 sanctioned by the Chief Engineer in his C.E.R.No.80 of 50-51 and approved by the Surgeon-General in his No. 88881-1-G2 dated 16-4-51.

I submit herewith for favour of urgent approval, Revised Design, T.S.M.No.14/51 for the Twin Ward of 20 beds each in modification of the previous approved plan, T.S.M.No.1/50.

P.T.O.

2. We do not feel happy over the number of W.Cs' provided for in the original drawing, T.S.M.No.1/50. On enquiry of other Sanatoria, we find that reasonably there should be one Bath room for 10 patients, one W.C. for 5 patients and in addition there should be one separate chamber where bed pans can be emptied, washed and kept. For the 20 patients in each of the two wards, we require 2 Bath Rooms, 4 W.Cs' and one Slop. And the present revised design provides for the same at either end of the Twin-Ward Block.

11. We realise that it would be idle to speculate on the number of beds in the Twin-Ward ever being reduced below 40 in spite of the explanation in para 4-(iii) of the Note accompanying the sanctioned estimate for Rs.36,000/- that the number of beds in each of the 2 wards could be regulated according to pressure and varied as 20,18,16,14; or even 12 as it should be for permanent arrangement. In stead of the number being reduced, in practice there is far greater chance of the number being reduced, in practice there is far greater chance of the number in each of the 2 wards being increased to 24 with cots 2½' wide drawn closer with 2½' space between the cots. Further there are the tempting verandahs where possibly patients might be crowded during fair weather at any rate. We have to go round the local hospitals to see how they are crowded with patients. We believe that there are already over 40 patients suffering from T.B. in the two local hospitals and there is considerable pressure for further admissions.

111. Thus on all grounds it is met that adequate number of W.Cs. etc. should now be provided during first construction, as has been proposed above.

3. With 20 patients in each ward so close to each other as against 12 under permanent arrangement, it is desirable to keep one of the two end rooms for "Patient too ill". Accordingly the northern room in each of the two wards is extended for the width of the verandah so as to give 15' x 9' room for the patient and it is provided with good light and ventilation as shown on the drawing.

4. The southern rooms are similarly extended and provided with additional windows, the east end room to serve as Ward Kitchen for the whole block and the west end room for use as store-room where patients' belongings may also be kept. Single ward kitchen or single store room seems adequate for the whole block.

5. The northern steps to the verandah centrally to the Nurses' Duty Room & Corridor is replaced in the present design by a ramp for trolley to move patients from the ward to the Operation Block, etc., vide Drg. T.S.M.No.11/51 just submitted to you with a separate reference.

6. Two 9" diam. pipe culverts will be provided under the floor across the Block, as shown on the Drawing, for cross drainage of the intercepted storm water.

7. The sections of basement and foundations are just the same as in the previous approved design, but the depths of foundations are now suitably proposed but tentatively on the basis of the General Specification approved with the sanctioned estimate for Rs.36,000/- and having regard to the actual ground levels on the site where the block is to be erected and the proposed ground levels as shown on Drg. T.S.M.No.11/51. They are finally to be approved and fixed by the Executive Engineer, P.W.D.S.K.Dn., Mangalore on inspection of the foundation trenches.

8. In other respects, the present design leaves original Drawing T.S.M.No.1/50 unaltered. Further the Specifications previously approved by the Chief Engineer shall apply to the present design, as is mentioned in Note 2 on the Drawing.

9. We have already stated that this District Branch will meet from their other funds the excess cost of Rs. 10,000/- out of the sanctioned estimate amount of Rs. 36,000/- They have likewise agreed to meet themselves the further extra cost involved by these proposals which have also been approved by them. Hence, there is no need for any revised estimate being prepared and submitted for sanction by the Chief Engineer.

10. As we are only improving the design and we expect no objection we shall proceed with the work in anticipation of formal approval to the design now submitted.

11. Two B.P. Copies of the Drawing, T.S.M.No.14/51 are submitted herewith to the Director of Medical Services, Madras, with the request that he may be pleased to approve the same, countersign one copy and transmit it to the Chief Engineer for similar approval and return to me. The other, i.e., 2nd copy is for record in the Office.

One B.P. Copy of the Drawing is submitted to the Chief Engineer for record in his office and it is requested that on the receipt of the plan from the Director of Medical Services, he may be pleased to approve the plan, countersign and send the same to me.

Thanking you.

P.T.O

(Previous note of P.W.D. will be found at p. 5 ante)

Further notes of depth may be perused. With reference to portion marked 'A' of the Health Dept. note at p. 6 ante, it may be mentioned that this dept. is concerned only with issue of orders where in cases in which the expenditure is debitable to '50. a civil works etc'. Orders in respect of part and full contribution works invariably issue from the administrative dept. concerned.
